Dudhope Young People's Inpatient Unit is a new £8 million development, part of the North of Scotland Regional Child and Adolescent Mental Health Service and is due to be handed over to the client on 6th March 2015. The facility is to be
based on the site of the existing YPU at Dudhope Terrace, Dundee and will include a 12-bed inpatient unit with an education facility and family accommodation for patients from across the North of Scotland.
The new purpose built unit is a partnership between Tayside, Grampian, Highland, Orkney and Shetland NHS Boards for young people with severe and complex mental health problems. This unit will ensure that those who need inpatient mental health care get the best possible treatment and support in a suitable and modern environment tailored to their needs. Dart Valley high security products were specified for all the en-suites. These incorporated WC
flushvalves, high security basins with low backplates complete with integrated water spouts and waveon sensors, WM anti-ligature shower heads with anti-vandal sensors- all controlled by our standard washroom control system. To ensure that every system functions perfectly Dart Valley engineers were involved in the installation and commissioned every en-suite. The safe ensuites were chosen as they are designed for the toughest environments and manufactured using advanced technologies, they are also robust yet designed to look domestic, making it ideal for therapeutic environments.
The DVS high security sanitaryware range has been designed and tested to be vandal proof and avoid ligature points wherever possible. All DVS products will of course be backed by our 5 year warranty.
