

Restrictaflow in-line restricting valve - 15mm

AC17-039

Restrictaflow in-line restricting valve

Restrictaflow units to be installed where restriction of water flow is required to encourage savings on water usage and sewage charges. Additional benefits include using the restrictaflow as an isolating valve to aid maintenance, blockages can also be cleared by reversing the valve.

Technical data

Material	Chromium-plated brass
Weight	0.15kg
Type of fixing	15mm compression
Nominal flow rate	4l/min
3mm allen key required to operate	Not supplied
