

Bath control system

SH07-020

Bath control system

The bath filling control system (SH07-020) can be used with wave-on or tactile switches. The half fill level is half that of the full fill which is adjustable. There are a number of kits available to suit a wide range of requirements. Benefits of the bath filling control system are similar to the shower control system except that it operates a single valve post thermostatic mixer, with the option of hot and cold if required.

Technical data

Weight	1.3kg
Material	Polycarbonate
Run times	Please see instructions
Power source	230V a.c.
IP rating	X4
Voltage	230V a.c.
