

## CASE STUDY

## ST. BERNARD'S HOSPITAL

St Bernard's Hospital in Southall, West London, is undergoing major redevelopment to improve the site's infrastructure, whilst resulting in modern, well-constructed buildings, designed to support high quality care and flexibility to meet the needs of future patients and services.

As part of the redevelopment, a new 80 bed medium secure unit (MSU) on the existing John Conolly Wing site was approved by the Department of Health in Dec 2013, which meant work to construct the new MSU commenced in 2014 and is due for completion in early 2016.

Dart Valley High Security products were required throughout. These include; HS mirror with integrated shelves (90 of these alone!), HS basins with integrated shelves, both the standard and disabled height V2 pans, WC flushvalves and WM anti-ligature 30° showerheads- all controlled by our Washroom Control Systems and tactile switches.

The safe ensuites were chosen as they are designed for the toughest environments and manufactured using advanced technologies, they are also robust yet designed to look domestic, making it ideal for the therapeutic environments.

The DVS high security sanitaryware range has been designed and tested to be vandalproof and avoid ligature points wherever possible. DVS will continue to work with the hospital to adapt our range to suit new and existing patient environments.

All DVS products will of course be backed by our 5 year warranty.
