To whom it may concern,

After extensive initial research followed by a trial of a Medi-ShowerTM anti-microbial showering system the Galway Clinic has purchased the system to replace all traditional showerheads and hoses throughout the hospital. The decision to use Medi-ShowerTM was made for a number of reasons. Firstly the silver ion technology incorporated throughout the product offers a proven bacterial risk reduction for both patients and staff. The colour-coded replaceable inserts are simple to use and have greatly improved our ability to monitor cleaning regimes. Medi-ShowerTM is a sustainable solution which reduces maintenance costs and user reaction to the showering experience has been very positive to date.

Kind regards

Enda Elwood
