PROGRAMMABLE SENSOR & PROGRAMMER

The integrated basin can be controlled using DVS Programmable Stainless Steel Sensors, which feature adjustable settings via the Handheld Programmer (Programmer not compatible with tactile control option).

Real time data can be uploaded from the Programmer via the integrated USB, allowing accurate monitoring of water efficiency.

FEATURES

- Adjustable run time
- Adjustable range for different length spouts
- Anti-vandal mode on / off and adjustable time
- Automatic and time adjustable purge
- Chlorination mode
- User detection or wave-on / wave-off function
- USB connection to upload real-time data to PC
- Tap read function produces data on; total run time and total number of operations and purges
