

# NEW SAFE ENSUITE SINGLE SPOUT INTEGRATED BASIN

## OVERVIEW

Part of the DVS Safe Ensuite range, the DVS single spout basin has been designed for the toughest environments—manufactured using advanced technologies, it is robust, vandal resistant and avoids ligature points where possible.

Additional properties include high resistance to cyclical stresses and dual stage failure mode, this provides excellent impact resistance and will not be subject to catastrophic failure.

The surface is a white high-grade polyester gel coat as standard. It is formulated to provide high chemical resistance and resistance to ultraviolet effects.

## MAIN FEATURES

- Polyester gel coat finish
- GRP impact resistant construction
- Rear concealed waste outlet
- 316 Stainless Steel anti-ligature waste grid
- Integrated water spout
- Moulded soap shelves
- Fixing kit for 100mm wall thickness (supplied as standard)

## OTHER FEATURES

- Hygienic no-touch operation via DVS Programmable sensor & handheld programmer (available separately)

## OPTIONS

- AC02-017 Programmable sensor
- AC01-010 Handheld Programmer
- VR01-032 Stainless Steel anti-ligature waste grid
- VR01-009 Fixing kit for 100mm wall thickness (supplied as standard)
- VR01-007 Fixing kit for 150mm wall thickness
- VR01-008 Fixing kit for 250mm wall thickness

VR01-039 (Programmable sensor available separately) ^^

Anti-ligature and vandal resistant waste grid included ^^

- 316 Stainless Steel
- BMA compliant
