

6V Isolation system

**AC04-030**  
6V isolation system

6V Isolation System, designed to shut off a water supply to a 6V latching valve. This prevents water wastage and possible overflow damage. Works via a momentary push button (to close the valve) and key switch (to isolate the power). Mains operation recommended.

Technical data	
Material	Brushed chrome
Gross weight	0.5kg
Operation type	Push button and key switch
Connection type	M8 connector
Compatibility	KWC DVS programmable sensors & no-touch taps
