

DVS Specified for 60 bed medium secure unit...

Langdon Hospital provides forensic mental health services for the Devon Partnership NHS Trust. The service supports people who, as a consequence of their mental health problems, have had contact with the legal system and require a safe and secure environment.

Dart Valley Systems have worked with the Hospital for many years helping to improve the patients living environment, with a combination of the DVS high security sanitaryware installed.

Recently the new build Dewnans Centre, part of the 111 acre Langdon Hospital site, which opened in 2013, saw DVS engineers install the full range of high security safe ensuites to accommodate 60 people in this state of the art, new four wards.

The safe ensuites were chosen as they are designed for the toughest environments and manufactured using advanced technologies, they are also robust yet designed to look domestic, making it ideal for therapeutic environments.

The DVS high security sanitaryware range has been designed and tested to be vandal proof and avoid ligature points wherever possible. DVS will continue to work with the hospital to adapt our range to suit new and existing patient environments.

All DVS products will of course be backed by our 5 year warranty.
