

Work is now complete on Phase 1, the northern block, of the state-of-the-art new mental health and learning disabilities inpatient facility at Kingsley Green, Radlett – part of the Hertfordshire Partnership University NHS Foundation Trust.

The centre, designed as a therapeutic environment for adults experiencing a mental health crisis, features 86 ensuite single bedrooms, as well as courtyard gardens for active recreation and quiet reflection, a shop, café, and innovative treatment and therapy areas.

DVS supplied low risk ensuites to Caledonian Modular Ltd, who supplied the PODs to the trust.

The building, which reflects international best practice, has been designed by P+HS Architects with the input of service users and carers to provide a supportive and recovery-focused environment.

The safe ensuites were chosen as they are designed for the toughest environments and manufactured using advanced technologies, they are also robust yet designed to look domestic, making it ideal for therapeutic environments.

The DVS high security sanitaryware range has been designed and tested to be vandal proof and avoid ligature points wherever possible.

All DVS products will of course be backed by our 5 year warranty.
