KWC DVS. The
new name of DVS
& Franke Sissons

DVS
Dart Valley Systems

FRANKE

Over 200 years of experience

Dart Valley Systems has been producing leading automatic washroom technology for over 35 years, specialising in water-saving technology for commercial washrooms. DVS is a market leader in the field of water-saving products along with automatic washroom products for specialist applications.

Franke Sissons has been manufacturing commercial washroom products, catering equipment and hospital products for over 200 years. A market leader dedicated to providing quality stainless steel & solid surface composite sanitaryware products for public, semi-public & commercial use.

Both UK brands are now known as KWC DVS, providing one solution to some of the most demanding environments. Key markets include mental healthcare, healthcare, custodial, retail, leisure, education, airports, and other public and semi-public washrooms. With state of the art manufacturing facilities in the UK and Europe, KWC DVS can deliver standard, customised or fully bespoke solutions for any project.

CE/UKCA MARKING is applied to products to indicate conformity to the current regulations. Certifications can be found on our websites.

BREEAM Franke can assist specifiers in achieving BREEAM points for projects with a range of water and energy efficient products.

UNIFIED WATER LABEL Part of the BMA, the water efficient product label focuses on specific water saving products that are particularly water efficient.

NSF TMV3

TMV3 scheme ensures that products are suitable for healthcare environments and provide a safe water supply.

WRAS promote, encourage and enforce the prevention of waste, undue consumption, misuse, or contamination of water.

HOLDERS OF ISO9001 globally recognised rigorous set of standards for quality management.

HOLDERS OF ISO14001 globally recognised rigorous set of standards for environmental management

ACCREDITED CONTRACTOR CHAS The Contractors Health and Safety Assessment Scheme improves health and safety standards across the UK.

SAFE CONTRACTOR APPROVED SafeContractor delivers a tailored health and safety accreditation.

CONSTRUCTIONONLINE Help buyers to simplify and speed up their search, improving resource and cost efficiency through the validation of purchasing decisions. Based on suppliers completion of multiple document working to the PAS 91 criteria.

RIBA CPD We offer a choice of RIBA approved CPD interactive seminars – a must for anyone specifying washrooms for commercial projects.

BMA The Bathroom Manufacturers association acts as an information highway between Industry Government and the consumer on all issues that affect the bathroom business in the UK.

WELS Australian Standards relating to product quality, including health and safety efficiency.

UNIFIED WATER LABEL

The Unified Water Label is a smart tool that provides a means to identify water-using products, with a common label that offers clear, concise and easy to understand messaging about water and energy consumption.

NBS SOURCE is a tool that creates a single source for product information and data. There are over 200 products listed and a range of corresponding BIM models available for both Franke and Dart Valley branded ranges.

WATER TECHNOLOGY LIST (WTL)

WTL provides details of products that qualify for the enhanced capital allowance scheme, both Franke and Dart Valley branded ranges are listed in the database.

Versatile solutions from Franke Water Systems UK

Franke Water Systems provides intelligent sanitaryware and washroom products for public, semi-public and commercial facilities. From washrooms, shower rooms and toilet facilities to cleaning and hygiene areas, Franke Water Systems offer a comprehensive range of versatile product solutions.

Our technology and material expertise

Franke Water Systems have designed and developed a range of product technology in the highest quality materials in order to provide high performing solutions. From our patented FRAMIC innovation cartridge to our Miranit composite material, we have products for every environment. Our range of products for leisure and recreational environments is limitless and includes stainless steel, GRP and Miranit solid surface washbasins and washtroughs, free standing and wall mounted soap and hand sanitiser dispensers, a vast range of sanitaryware, taps, accessories, cleaning, janitorial and catering equipment.

Specification considerations

When designing washrooms for high usage areas such as campsites, leisure parks and other attractions, it is important to consider the types of products and how they cater to all users needs. Campsites in particular will need to have products available that are able to cope with a high number of users and be fit for purpose. Considerations may include adding a higher number of washbasins in the toilet facilities, after all this will be the main port of call for users brushing their teeth, washing hands, showering, and using the toilet. Therefore, it is important to consider high quality robust sanitaryware and the correct amount of products when designing and purchasing products for these areas.

RONDATOP AND QUADROTOP

Suitable for museums, modern restaurants and other leisure facilities

Miranit countertop washbasins

The RONDAtop and QUADROtop countertop washbasins provide a modern design along with hygiene benefits. These eye catching centrepieces have been designed with a unique, integrated seal, providing a streamlined and hygienic finish with easy installation, making additional sealing with silicone is a thing of the past. Manufactured from Miranit composite material, the solid surface basins easily transform the whole washroom and can revamp the overall look and space. Miranit is a poured material and manufactured using a single mould creating a finished product without any adhesive seams or joints.

Complement the washbasins with an elevated self-closing tap from the F5 range or a Dart Valley branded Aquarius high neck tap.

QUADROTOP COUNTERTOP BASIN

Countertop basin manufactured from Miranit composite material. No silicone required due to the integrated invisible seal. Bowl dims: 355 x 100 x 535mm (W x H x D)

PLANOX WASHTROUGHS

Seamlessly welded stainless steel washtroughs

20 – 21

Stainless steel washtroughs

The Planox range of washtroughs offers a functional, easy-to-clean and user-friendly solution whilst ensuring optimum hygiene. Manufactured from 1.2mm thick grade 1.4301 (304) stainless steel with a satin polished finish, these troughs can withstand high usage areas and busy areas such as theme parks, sports centres and holiday parks. The troughs are seamlessly welded using an innovative robotic laser, making them highly resistant to dirt and bacteria. The 1cm lowered tap ledge stops water from spilling on to the floor, preventing hazards and maintaining excellent levels of hygiene.

COMPLETE THE WASHROOM

Water saving taps

F3 and F5 range of taps

In highly frequented washrooms such as holiday park toilets or outdoor leisure washroom facilities, it is important to choose taps which reduce the impact of water wastage and vandalism whilst ensuring efficient hygiene.

The F5 range of taps excel in functionality and style and come in three ranges; electronic, self-closing and lever taps. All Franke F5S self-closing taps have been designed with the patented Franke Modular Innovation Cartridge (FRAMIC). The cartridge ensures stagnation-free, hydraulic control of the water flow and sets the highest hygiene standards.

The F3 range has been designed with a classic look in mind. The traditional and elegant design of the F3 taps are ideal for smaller washroom environments such as visitors centres.

*F5S taps only

F5S SELF-CLOSING PILLAR MIXER*

F5S-Mix self-closing pillar mixer with adjustable, turn-proof temperature stop. Designed with the FRAMIC self-closing cartridge. Nominal 5 litres per minute flow rate.

F5SM1001 208.0563.593

F5S SELF-CLOSING PILLAR TAP*

F5S self-closing pillar tap (pre-mixed) with adjustable flow duration. Designed with the FRAMIC self-closing cartridge. Nominal 5 litres per minute flow rate.

F5SV1001 208.0563.594

F5L-MIX PILLAR LEVER TAP

Designed with a mixing cartridge with ceramic disc technology and thermostatic protection from scalding. Nominal 5 litres per minute flow rate.

F5LM1001 208.0563.550 100mm project.

F5LM1002 208.0563.591 125mm project.

F3S SELF-CLOSING PILLAR TAPS

Hydraulically controlled self-closing function which prevents water from flowing back through the system. Nominal 3 litres per minute flow rate.

F3SM1001 208.0563.601 mixer tap

F3SV1001 208.0519.518 pre-mixed

F5EM1001

*The Franke Modular Innovation Cartridge (FRAMIC)

The ceramic self-closing cartridge is the first of its kind in tap disc technology and enables a stagnation-free, hydraulic control of water flow ensuring perfect water hygiene. The operation of the cartridge is flow pressure-independent meaning drinking water is kept completely separate to the functional elements of the tap.

COMPLETE THE WASHROOM

Touch-free water saving taps

High performance touch-free taps

Hand washing has never been so important as it is today. The touch-free and sensor range of taps provides ultimate flexibility in the washroom for any leisure or holiday environment. With three different ranges; F5E, Aquarius wall mounted straight spouts and the Classic range there is a solution for any size or type of washroom. The range of taps are all electronically controlled and provide a hygienic touch-free hand washing solution even in the busiest of environments. These WRAS approved taps come in a range of finishes, from satin and high polish grade 316 stainless steel to high polished chrome plated brass. The range is fully programmable with additional functions such as hygiene purge, lockouts and anti-vandal features. DVS and Franke hand held programmable remotes are sold separately.

AQUARIUS TOUCH-FREE DECK MOUNTED 45° SPOUT

Touch-free spout with a satin finish and PEX hoses. Nominal 5 litre per minute flow rate.*

AT03-011 208.0000.080 140mm project.

CAMBRINO BABY CHANGING TABLES

Whether you are visiting an adventure park or away on an outdoor holiday, it is important when you are out and about with young children that the correct facilities are available. Franke Water Systems have designed flexible and modern baby changing tables for wall mounting which can be integrated into almost any washroom environment or baby changing facility.

The range has been developed with two design options (horizontal or vertical) to fit any space, and with a stainless steel or Polypropylene finished front in order to complement any style of modern washroom. The Cambrino baby change units are manufactured with antibacterial Biocote® reducing odor and staining, and comply with BS EN 12221-1 and EN 12221-2 standards, ensuring a hygienic, safe and practical solution.

CAMPING AND HOLIDAY PARKS

Showers for busy environments

Showering facilities for holiday parks and campsites

When on holiday, comfort is a key consideration, particularly when going on an outdoor adventure holiday, activity holiday or a camping holiday. Location and available facilities are of the utmost importance when it comes to choosing the perfect campsite or location for a relaxing getaway. Franke Water Systems can guarantee all your guests are happy with the range of F5 and DVS branded range of showers. This modern, easy to use range has been designed with quality materials and is available in either Miranit composite or stainless steel which are able to withstand high footfall and continuous use.

F5S-MIX SHOWER PANEL

Miranit composite shower panel for wall mounting with DN 15 self-closing single control mixer.*

F5SM2026 210.0629.599

F5E-THERM SHOWER PANEL

Stainless steel shower panel for wall mounting with thermostatic mixer.*

F5ET2020 210.0629.651

F5S-MIX SHOWER PANEL

Stainless steel shower panel for wall mounting with DN 15 self-closing single control mixer.*

F5SM2020 210.0629.60

DVS STANDARD SHOWER TOWER

Wave-on standard shower tower with high security shower head, mains operated.

SH01-002 210.0633.963

Aquajet slimline

Shower head with plastic jet face with anti-limescale system and low aerosol formation.

SHAS0011 210.0588.383

Aquajet comfort

Adjustable shower head (13–23°) anti-limescale & low aerosol formation.

SHAC0011 210.0588.384

*Shower heads sold separately for F5 shower panels.

F5ET2020

High water consumption and continuously increasing operating costs are typical indicators of high usage shower facilities. The Aquapay token system from Franke can provide an economical, water and cost saving solution when combined with the intelligent technology of F5 shower panels.

As every facility is different, we can create a bespoke solution for you, please get in touch to discuss your requirements.

TDV & TMV

Prevents biofilm reducing the risk of water-borne pathogens*

Thermal disinfection and thermostatic mixing valves

In any facility infection prevention should be considered particularly in public areas. The DVS thermal disinfection valve (TDV) has been designed to prevent biofilm, reducing the risk of water-borne pathogens by allowing thermal disinfection from the TMV through to the outlet (1 x TDV is required per TMV). The valve is suitable for taps, showerheads and other washroom equipment fitted with a TMV.

The thermostatic mixing valve (TMV) has been designed for use with basins, showers and baths. The valve is manufactured to control water outlet temperature to fall within +/-2C regardless of fluctuations in temperature and pressure of hot and water supplies. The valve will shut the mixed water outlet immediately if hot or cold water were to fail. The TMV from Dart Valley Systems is WRAS approved under the TMV3 scheme to the DO8 specification.

Thermal disinfection is enabled manually via a hex socket key with quarter turn operation. The integral non-return valves prevent a backflow of water ensuring excellent levels of hygiene. Manufactured from DZR brass which is highly resistant to corrosion and is compatible with 22mm or 15mm pipework (3 x 15mm reducers required).

TDV features

- Reduces risk of water-borne pathogens
- Simple, single quarter turn operation
- Integral non-return valves to prevent backflow
- Corrosion resistant DZR brass body
- Suitable for 22mm and 15mm pipework
- Compliant with water regulations and by-laws
- WRAS approved

AC17-080	208.0606.554	Thermal disinfection valve
AC17-047	201.0000.161	Thermostatic mixing valve

Reduces risk of pathogens

Compliant with regulations

Robust material

Easy system maintenance

*If installed and maintained to the manufactures instructions

Normal operation
The valve allows water to flow through the TMV as normal providing safe pre-mixed water.

Thermal disinfection operation
The valve allows hot water to bypass through cold side pipework and flow through the TMV to the outlet.

Approval for TMV only

STAINLESS STEEL URINALS

Save water with standard and waterless urinals

Urinal control system
Two station urinal control kit, complete with mains control box, two solenoid valves & two sensors
UC07-011 205.0611.714

Urinal flush controls
Flushmatic surface mount kit in White – battery complete with solenoid valve
UC01-005 205.0611.714

G20123N

URINAL POD
Durable stainless steel urinal pods, with duct mounted cistern and water-free options.
CMPX538WF 205.0000.057 push fit, water-free
CMPX538P 205.0000.047 push fit
HDTX538P 205.0000.052 bolt fix

WATERLESS SLAB URINAL
Stainless steel waterless urinal slabs, easy to maintain with unique key system, available with left and right hand wastes.
G20125L 205.0560.088 1200mm left hand
G20125R 205.0000.066 1200mm right hand
G20126L 205.0553.762 1800mm left hand
G20126R 205.0553.763 1800mm right hand

CENTINEL SLAB URINAL
Stainless steel urinal with concealed sparge pipe, complete with cistern. Bespoke lengths and exposed sparge pipe options are also available.
G20117N 205.0000.058 1200 x 300 x 555mm (9l)
G20123N 205.0000.064 1500 x 300 x 555mm (9l)
G20118N 205.0000.059 1800 x 300 x 555mm (13.5l)
G20119N 205.0000.060 2400 x 300 x 555mm (13.5l)

STAINLESS STEEL URINALS
Over half of 'domestic' water used in commercial premises can be due to urinals operating without flush controls. Adding the correct flush controls such as DVS Flushmatic, or installing waterless products can vastly reduce water bills with minimal initial outlay, particularly in high usage areas such as theme parks, holiday parks and more.
All Franke branded urinals are manufactured from robust 1.2mm thick grade 1.4301 (304) stainless steel with a satin finish. The urinals have been specifically designed for easy installation and maintenance.
