

Buckingham Primary School, Hull, are determined to provide their pupils with an inspiring, broad curriculum against a backdrop of contemporary, stimulating, and practical facilities. [Inspired Washrooms](#), a Nottingham based fit-out company, carried out a recent revamp of their school washrooms using specified KWC DVS products.

The full list of products provided are as follows:

- 1 x [SOLX1200T](#) - 2 Person Miranit Washtrough, 1200mm Long Complete With 2 Tapholes & Centre Waste
- 2 x [F3SV1001](#) - Self Closing Pillar Taps
- 4 x [CHRX699](#) - Stainless Steel Mini Jumbo Toilet Roll Holder

Our Miranit range is hard-wearing, and stylish. The Jumbo toilet roll holder is made from stainless steel providing a hygienic and easy to clean solution. Its smooth, surface-stain finish, and non-porous surface means that dirt and bacteria struggle to establish themselves on its exterior. When they do, they can very easily be wiped away. The easy maintenance makes stainless steel an excellent choice in environments such as these where strong hygiene practice is essential.

Chris Kightley, Managing Director of [Inspired Washrooms](#), commented, “We work with KWC DVS on a recurrent basis and can always rely on them to provide us with quality products. A trusted partner, we’ve worked on various projects together. Their Miranit composite range and stainless-steel products were perfect for the youthful but practical washroom refurbishment the school was after.”
