

Floor standing chilled drinking fountain

ANMX308

Floor standing chilled drinking fountain

The range of Water Gem water coolers and drinking fountains from KWC DVS offer a low maintenance and reliable solution where chilled drinking water is required in commercial buildings. Available as either floor standing or wall mounted and with or without a bottle filler, the products are connected direct to the mains water supply and supply an unlimited amount of chilled water which always has a fresh taste. The products are made from durable coated steel panels and have an

easy to open front pane for installation and maintenance. The key for the Water Gem products is the same as for the Franke Rodan series of washroom accessories to simplify the number of keys needed for maintenance purposes. The products are provided with a chlorine based water filter as standard and this is recommended to be replaced every 6 months. Replacement filters are available from KWC DVS. With water filter.
