

KWC
High-security ligature resistant vanity cabinet

Model line: High Security | **VR01-130**

VR01-130
High-security ligature resistant vanity cabinet

The high-security ligature-resistant vanity cabinet is engineered for environments demanding maximum safety, durability, and tamper resistance. Designed with smooth, rounded edges and concealed fastenings, this cabinet is fully ligature-resistant, minimising risk in high-security or healthcare settings. Its robust construction withstands

impact and tampering, while an easy-to-clean surface supports hygiene and simplifies maintenance. With a discreet, contemporary design, the cabinet provides both security and functionality, making it an ideal choice for facilities prioritising safety and resilience.
